

Your business is at the center of everything we do.

Our energy account managers, supported by our management team, work with you to develop the smartest options for your energy procurement needs.

Remember, changing providers does not come with a fee, from them or from us. So, if you're ready to make a better choice, contact us and we'll look at your current contract. Please give us a call at 800-531-8575 or visit us at valuedmerchants.com

About VMS Energy

The thing to know about us is that we're all about you. When we started offering Energy programs in 2008, our focus was helping customers select the best retail electric provider (REP) in a deregulated market, explaining how deregulation could work in our customer's favor by having a partner who knows the energy markets, and understands their business. That focus hasn't changed – it's grown and it's gotten sharper. We now serve customers in Texas and 15 other states

VMS sets the standard for energy market expertise and customer service. We invest in developing the best-trained, most knowledgeable staff in the industry. We're plugged into the energy markets every day, monitoring activity, tracking changes, and evaluating trends in existing and newly deregulated markets. Building trusted relationships with our customers is a foundational principle – knowing you, knowing energy, and knowing how to guide you to better choices is how we roll.

Energy cost management is about better choices.

We Get Started

Tell us about your business, how you use energy, and what you expect from an energy partner.

Let's look at your electricity bill.

Let's look at your current rates.

We Get Smarter

We'll identify usage patterns for cost management opportunities.

We'll evaluate your bill and identify any savings or opportunities.

We'll find you the lowest possible rate.

You Get Better

If you're entitled to cost reductions or refunds, we'll advocate for you and get it done.

We'll come back with options and solutions as we learn more about you.

We'll advise you on energy market trends and rate-savings opportunities.

We're your advocates. We go to bat for you. We negotiate with providers to straighten out anything in your energy bill that doesn't make sense or doesn't belong there. In addition, we'll come back to check in — not just to renew your contract, but also to evaluate your energy costs to see how our solutions are helping to better manage your energy costs and improve your bottom line.

You need to make the best energy choices for your business. That's why you need to meet with VMS.

We're committed to reducing energy costs to improve your profitability. Our solutions are based on combinations of lowest available wholesale rates, energy use management, leveraging our supplier relationships, and consistently managing your energy account.

VMS Energy helps you make the right decisions.

Who do you want to buy your power from?

How much should you pay for it?

What does your rate include?

How do you aggregate multiple locations?

When is the best time to contract?

What's in your contract language?
